

Is your driveway Gray Concrete? Stamped?  
Exposed Aggregate? Colored Concrete?

Sealing after the concrete has cured every few years is recommended maintenance.

Why?

- Help prevents efflorescence
- Stain protection
- Reduces the chance of freeze/thaw damage

Sealers will enhance and protect.

When properly sealed/resealed the life of the concrete is extended.

Ask a sales associate what sealer is needed  
for your concrete!

OPEN 7:00AM TO 4:00PM MONDAY THRU FRIDAY
